SPECIAL WATER DISTRICT # 1  
OTTER LAKE FIRE HALL  
13853 State Rte. 28, Forestport, N.Y. 13338**

**July 20, 2022 @ 6:30 PM  
AGENDA**

- 1. CALL TO ORDER:**
- 2. TOWN CLERK MINUTES:**
  - Special Water District #1 Minutes- June 15, 2022, Sent Electronically
- 3. ABSTRACT:**
  - Abstract # 7– Vouchers # 85-#98 in the amount of \$37,204.15
- 4. WATER REPORTS:**
  - Monthly Report
- 5. OLD BUSINESS:**
  - Buckhorn Update
  - Water District Operator
- 6. NEW BUSINESS BOARD:**
  - Bond agreement for Buckhorn
  - Survey estimate for Buckhorn
- 7. NEW BUSINESS PUBLIC**
- 8. ADJOURNMENT:**

the 1990s, the number of people who have been employed in the public sector has increased in all countries. The increase has been particularly large in the United States, where the public sector has grown from 15% of the total workforce in 1970 to 25% in 1995 (see Figure 1).

There are a number of reasons for the increase in public sector employment. One reason is that the public sector has become a more attractive place to work. This is due to a number of factors, including the fact that public sector jobs are often more secure than private sector jobs, and that public sector workers often receive better benefits than private sector workers. Another reason for the increase in public sector employment is that the public sector has become a more important part of the economy. This is due to the fact that the public sector has become a major provider of social services, such as education, health care, and social security.

The increase in public sector employment has had a number of effects on the economy. One effect is that it has led to a decrease in the unemployment rate. This is because public sector jobs are often more secure than private sector jobs, and therefore people are more likely to accept public sector jobs than private sector jobs. Another effect is that it has led to an increase in government spending. This is because public sector workers are paid by the government, and therefore the government has to spend more money on public sector jobs.

The increase in public sector employment has also had a number of effects on the labor market. One effect is that it has led to a decrease in the demand for private sector jobs. This is because public sector jobs are often more secure than private sector jobs, and therefore people are more likely to accept public sector jobs than private sector jobs. Another effect is that it has led to an increase in the demand for public sector jobs. This is because the public sector has become a more important part of the economy, and therefore there is a need for more public sector workers.

The increase in public sector employment has also had a number of effects on the government budget. One effect is that it has led to an increase in government spending. This is because public sector workers are paid by the government, and therefore the government has to spend more money on public sector jobs. Another effect is that it has led to a decrease in government revenue. This is because public sector workers are often paid higher wages than private sector workers, and therefore the government has to pay more money to public sector workers.

The increase in public sector employment has also had a number of effects on the economy as a whole. One effect is that it has led to an increase in the size of the government. This is because the public sector has become a more important part of the economy, and therefore the government has to spend more money on public sector jobs. Another effect is that it has led to an increase in the size of the public sector. This is because the public sector has become a more important part of the economy, and therefore there is a need for more public sector workers.

The increase in public sector employment has also had a number of effects on the labor market. One effect is that it has led to a decrease in the demand for private sector jobs. This is because public sector jobs are often more secure than private sector jobs, and therefore people are more likely to accept public sector jobs than private sector jobs. Another effect is that it has led to an increase in the demand for public sector jobs. This is because the public sector has become a more important part of the economy, and therefore there is a need for more public sector workers.

The increase in public sector employment has also had a number of effects on the government budget. One effect is that it has led to an increase in government spending. This is because public sector workers are paid by the government, and therefore the government has to spend more money on public sector jobs. Another effect is that it has led to a decrease in government revenue. This is because public sector workers are often paid higher wages than private sector workers, and therefore the government has to pay more money to public sector workers.

The increase in public sector employment has also had a number of effects on the economy as a whole. One effect is that it has led to an increase in the size of the government. This is because the public sector has become a more important part of the economy, and therefore the government has to spend more money on public sector jobs. Another effect is that it has led to an increase in the size of the public sector. This is because the public sector has become a more important part of the economy, and therefore there is a need for more public sector workers.

The increase in public sector employment has also had a number of effects on the labor market. One effect is that it has led to a decrease in the demand for private sector jobs. This is because public sector jobs are often more secure than private sector jobs, and therefore people are more likely to accept public sector jobs than private sector jobs. Another effect is that it has led to an increase in the demand for public sector jobs. This is because the public sector has become a more important part of the economy, and therefore there is a need for more public sector workers.
